How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) Michael J. Campbell, Stephen J. Walters
A complete guide to understanding cluster randomised trials

Written by two researchers with extensive experience in the field, this book presents a complete guide to the design, analysis and reporting of cluster randomised trials. It spans a wide range of applications: trials in developing countries, trials in primary care, trials in the health services. A key feature is the use of R code and code from other popular packages to plan and analyse cluster trials, using data from actual trials. The book contains clear technical descriptions of the models used, and considers in detail the ethics involved in such trials and the problems in planning them. For readers and students who do not intend to run a trial but wish to be a critical reader of the literature, there are sections on the CONSORT statement, and exercises in reading published trials.

- Written in a clear, accessible style
- Features real examples taken from the authors' extensive practitioner experience of designing and analysing clinical trials
- Demonstrates the use of R, Stata and SPSS for statistical analysis
- Includes computer code so the reader can replicate all the analyses
- Discusses neglected areas such as ethics and practical issues in running cluster randomised trials

How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research provides an excellent reference tool and can be read with profit by statisticians, health services researchers, systematic reviewers and critical readers of cluster randomised trials.

From reader reviews:

Eunice Bosse:

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each publication has different aim as well as goal; it means that publication has different type. Some people feel enjoy to spend their time for you to read a book. These are reading whatever they take because their hobby will be reading a book. What about the person who don't like studying a book? Sometime, man feel need book when they found difficult problem as well as exercise. Well, probably you will require this How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice).

Christine Kaufman:

As people who live in the actual modest era should be change about what going on or data even knowledge to make these keep up with the era which can be always change and make progress. Some of you maybe will update themselves by reading through books. It is a good choice for you personally but the problems coming to an individual is you don't know what type you should start with. This How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

Gregory Richards:

Reading a e-book can be one of a lot of action that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new data. When you read a publication you will get new information since book is one of several ways to share the information or their idea. Second, reading a book will make an individual more imaginative. When you examining a book especially fictional works book the author will bring you to definitely imagine the story how the character types do it anything. Third, you could share your knowledge to other people. When you read this How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice), you could tells your family, friends along with soon about yours reserve. Your knowledge can inspire different ones, make them reading a publication.

Edward Johnson:

Can you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Try to pick one book that you never know the inside because don't assess book by its deal with may doesn't work at this point is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer could be How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) why because the excellent cover that make you

consider in regards to the content will not disappoint you. The inside or content is usually fantastic as the outside as well as cover. Your reading 6th sense will directly assist you to pick up this book.
