Risk Management and Corporate Governance (Routledge Advances in Management and Business Studies)

Risk Management and Corporate Governance (Routledge Advances in Management and Business Studies)

The asymmetry of responsibilities between management and corporate governance both for day-to-day operations and the board’s monthly or quarterly review and evaluation remains an unresolved challenge. Expertise in the area of risk management is a fundamental requirement for effective corporate governance, if not by all, certainly by some board members. This means that along with board committees such as "compensation", "audit", "strategy" and several others, "risk management" committees must be established to monitor the likelihood of certain events that may cause the collapse of the firm.

Risk Management and Corporate Governance allows academics and practitioners to assess the state of international research in risk management and corporate governance. The chapters overlay the areas of risk management and corporate governance on both financial and operating decisions of a firm while treating legal and political environments as externalities to decisions undertaken.
