Terrorism and Special Events Management

G.B. Jones

Terrorism and Special Events Management G.B. Jones
This book reviews background related to counter terrorism and law enforcement planning for major special events and it identifies some of the strategic issues that have emerged in special events management since the terrorist attacks of September 11, 2001. It focuses on the subjective and objective components of the systems currently used by DHS and the FBI to categorize and resource special events, and it evaluates whether the current approach to major event planning is sufficient for contemporary counter terrorism challenges. The thesis considers how changes in the present system may improve interagency counter terrorism preparedness. Finally, it applies risk management principles to the interagency special event planning process to determine if these principles are useful for developing a rational, politically defensible, and fiscally responsible approach to federal resource allocation for major special events.
