The Jesus Discovery: The New Archaeological Find That Reveals the Birth of Christianity James D. Tabor, Simcha Jacobovici
The Jesus Discovery is the story of a stunning new discovery that provides the first physical evidence of Christians in Jerusalem during the time of Jesus and his apostles.

In 2010, using a specialized robotic camera, authors Tabor and Jacobovici explored a previously unexcavated tomb in Jerusalem from around the time of Jesus. They made a remarkable discovery—two ossuaries, or bone boxes, one carved with the earliest known image of Jonah; the other displaying a reference to resurrection. Since the newly discovered ossuaries can be reliably dated to before 70 AD, it is possible that whoever was buried in this tomb knew Jesus and heard him preach. In addition, the newly examined tomb is in close proximity to the so-called Jesus Family Tomb, and its discovery increases the likelihood that the "Jesus Family Tomb" is, indeed, the real tomb of Jesus of Nazareth.
