Home vegetable gardening is all the rage. Millions of Americans have picked up spade and hoe and are digging into the soil for the first time. But starting a garden isn't always simple. Many hopeful growers find themselves confused by the dizzying array of things to know about soil quality, garden layout, seeds, temperatures, planting schedules, fertilizer, pests, watering, and harvesting. Still other first-time gardeners plant too much, only to find themselves overwhelmed and exhausted by July.

Barbara Pleasant is here to help. For each plan she provides plant and material lists, a plot layout, four-color photographs, and tips for succession planting to keep the garden productive all season long. Her all-organic approach ensures that the harvest is not simply tasty but also chemical-free.

Pleasant anticipates and answers novice gardeners myriad questions, guiding readers through the complexities of assessing site and soil, understanding the climate, choosing the very best vegetable varieties, starting seeds, identifying insect friends and foes, watering, fertilizing, mulching, and harvesting.
