Solar Engineering of Thermal Processes

John A. Duffie, William A. Beckman

Solar Engineering of Thermal Processes John A. Duffie, William A. Beckman

The updated fourth edition of the "bible" of solar energy theory and applications

Over several editions, *Solar Engineering of Thermal Processes* has become a classic solar engineering text and reference. This revised *Fourth Edition* offers current coverage of solar energy theory, systems design, and applications in different market sectors along with an emphasis on solar system design and analysis using simulations to help readers translate theory into practice.

An important resource for students of solar engineering, solar energy, and alternative energy as well as professionals working in the power and energy industry or related fields, *Solar Engineering of Thermal Processes*, *Fourth Edition* features:

- Increased coverage of leading-edge topics such as photovoltaics and the design of solar cells and heaters
- A brand-new chapter on applying CombiSys (a readymade TRNSYS simulation program available for free download) to simulate a solar heated house with solar- heated domestic hot water
- Additional simulation problems available through a companion website
- An extensive array of homework problems and exercises
