Language of Space and Form: Generative Terms for Architecture James F. Eckler

A unique graphical guide for using architectural terminology to jump-start the design process

This design studio companion presents architectural terms with special emphasis on using these terms to generate design ideas. It highlights the architectural thinking behind the terminology and helps readers gain a thorough understanding of space and form. Featuring double-page spreads with over 190 illustrated entries, the book fully explores, analyzes, and cross-references key elements and techniques used in architecture and interior design. Each entry first defines the common meaning of the term, then goes on to discuss in detail its generative possibilities. Scenarios involving the use of a design principle, or the way it might be experienced, further aid students in developing strategies for their own design.

In addition, Language of Space and Form:

- Divides entries into five categories for quick access to concepts, including process and generation, organization and ordering, operation and experience, objects and assemblies, and representation and communication
- Addresses studio practice from the ground up, encouraging readers to develop creativity and critical thinking as they develop a design process
- Offers supplemental online learning resources, including exercises that correspond to the book

A must-have reference for professionals and students in architecture and interior design, Language of Space and Form is destined to become a classic introduction to design thinking.

Then you are receiving problem with the book when compared with can satisfy your short period of time to read it because all this time you only find publication that need more time to be go through. Language of Space and Form: Generative Terms for Architecture can be your answer as it can be read by an individual who have those short free time problems.

Arthur Mead:

As a student exactly feel bored in order to reading. If their teacher expected them to go to the library in order to make summary for some book, they are complained. Just little students that has reading's internal or real their hobby. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Language of Space and Form: Generative Terms for Architecture can make you feel more interested to read.
