Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library

Adrian Kaehler, Gary Bradski

Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library Adrian Kaehler, Gary Bradski

Learning OpenCV 3.0 puts you in the middle of the expanding field of computer vision. Written by the creators of the free open source OpenCV library, this book introduces you to computer vision and demonstrates how you can quickly build applications that enable computers to “see” and make decisions based on that data. It’s thoroughly updated to cover new features and changes in OpenCV 3.0.

Computer vision is everywhere—in security systems, manufacturing inspection systems, medical image analysis, Unmanned Aerial Vehicles, and more. It stitches Google maps and Google Earth together, checks the pixels on LCD screens, and makes sure the stitches in your shirt are sewn properly. OpenCV provides an easy-to-use computer vision framework and a comprehensive library with more than 500 functions that can run vision code in real time.

From reader reviews:

Sybil Moore:

The book Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library can give more knowledge and also the precise product information about everything you want. Why then must we leave a good thing like a book Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library? Some of you have a different opinion about book. But one aim that will book can give many data for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or info that you take for that, you could give for each other; you could share all of these. Book Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library has simple shape however, you know: it has great and large function for you. You can appearance the enormous world by open and read a reserve. So it is very wonderful.

Carrie Correll:

The particular book Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library will bring you to the new experience of reading a book. The author style to clarify the idea is very unique. When you try to find new book to read, this book very acceptable to you. The book Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library is much recommended to you to read. You can also get the e-book from official web site, so you can quickly to read the book.

Kermit Moors:

Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library can be one of your starter books that are good idea. We all recommend that straight away because this publication has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to place every word into enjoyment arrangement in writing Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library yet doesn't forget the main point, giving the reader the hottest in addition to based confirm resource info that maybe you can be certainly one of it. This great information can certainly drawn you into brand-new stage of crucial considering.

Allen Lutz:

Your reading 6th sense will not betray anyone, why because this Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library publication written by well-known writer who really knows well how to make book that could be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and publishing skill only for eliminate your own personal hunger then you still question Learning OpenCV 3: Computer Vision in C++ with the OpenCV Library as good book but not only by the cover but also by content. This is one book that can break don't judge book by its include, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your examining sixth sense already alerted you so why you have to listening to an additional sixth sense.
