Internetworking with TCP/IP Vol. III Client-Server Programming and Applications-Windows Sockets Version Douglas E. Comer, David L. Stevens

This volume answers the question "How does one use TCP/IP?"—focusing on the client-server paradigm, and examining algorithms for both the client and server components of a distributed program. **KEY TOPICS:** It presents an implementation that illustrates each design and discusses techniques like application-level gateways and tunneling. The book also reviews several standard application protocols and uses them to illustrate the algorithms and implementation techniques.
